1 | KEY INFORMATION SUMMARY

What is this?

Fisher Funds LifeSaver Plan (LifeSaver) is a managed investment scheme. Your money will be pooled with other investors' money and invested in various investments. Fisher Funds Management Limited ('Fisher Funds', 'we' or 'us') will invest your money and charge you a fee for its services. The returns you receive are dependent on the investment decisions of Fisher Funds and the performance of the investments.

The value of those investments may go up or down. The types of investments and the fees you will be charged are described in this document.

What will your money be invested in?

LifeSaver offers you a choice of seven funds to invest in. These investment options are summarised below. More information about the investment target and strategy for each investment option is provided in Section 3.

Other charges: In addition to the annual fund charges, you may also be charged from your LifeSaver account: an administration fee; a supervisor fee; and/or expenses for services such as legal and audit services. Refer to your employer supplement (What are the fees?) for more information on these fees.

See Section 4 for an explanation of the risk indicator and for information about other risks that are not included in the risk indicator. To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at fisherfunds.co.nz/lifesaver.

Who manages LifeSaver?

Fisher Funds Management Limited is the manager of LifeSaver. See Section 7 for more information about us.

How can you get your money out?

LifeSaver is a long term investment plan designed to help you save for your retirement. You'll be able to withdraw your investment or have benefits paid when you retire or resign. There are also some special circumstances when you can access your investment. See Section 2 for further information.

How will your investment be taxed?

LifeSaver is a Portfolio Investment Entity (PIE). The amount of tax you pay in respect of a PIE is based on your prescribed investor rate (PIR). This can be

10.5%, 17.5% or 28%. See Section 6 of the PDS ('what taxes will you pay?') on page 10 for more information.

Where can you find more key information?

LifeSaver is made available to you through your employer. You must read the accompanying employer supplement which summarises the rules of your Employer Scheme.

Fisher Funds is required to publish quarterly updates for each fund. The updates show the returns, and the total fees actually charged to investors, during the previous year. The latest fund updates are available at fisherfunds.co.nz/resources. The manager will also give you copies of those documents on request.

2 | HOW DOES THIS INVESTMENT WORK?

About LifeSaver

LifeSaver is a workplace savings scheme which you can join if your employer has agreed to participate. LifeSaver is designed to help you save for the retirement lifestyle you would like to enjoy in the future and offers a range of funds to invest in.

When you join, you become a member of LifeSaver, and money you invest is used to buy units in the fund or funds that you've chosen.

- » Each unit you buy will have a price calculated each day based on the value of the fund's assets at the time.
- » Changes in the value of the fund's assets (up or down) are reflected in the unit price.

LifeSaver is a trust governed by a Governing Document between Fisher Funds and Trustees Executors Limited (the Supervisor). Your investments are held by the Supervisor or a custodian appointed by the Supervisor, who is independent from Fisher Funds. Each fund is accounted for separately so assets in one fund can't be used to meet the liabilities of another.

What are the benefits?

Joining LifeSaver and making regular contributions is a smart choice to achieve your retirement goals because:

- » **LifeSaver makes saving easy:** Your regular contributions are automatically deducted directly from your salary by your employer and paid to your LifeSaver account.
- » **Investing is all we do:** At Fisher Funds we only do investments. We're not distracted by trying to manage other products or services. You'll have the full attention of our professional investment team with over 300 years' combined experience, who'll make the investment decisions on your behalf.
- » **We get to know you:** We've got a team of passionate, down to earth advisers who are with you every step of the way.
- » **Value for money:** We're here to help with financial advice at no extra charge to help you make sure your investment choices are aligned with your financial goals.

You may also be entitled to certain benefits paid from LifeSaver in circumstances set out in the 'Other Material Information' document available at fisherfunds.co.nz/resources and in your employer supplement.

Responsible investment

Responsible investing is deeply ingrained into our research process. We won't invest in manufacturers of tobacco, weapons that cause indiscriminate and disproportionate harm, including nuclear armaments, and companies where their core business includes the

ownership of reserves of coal, oil or gas and deriving revenue from the upstream activities associated with these reserves. We won't invest in companies where their core business includes operating gambling establishments, or the manufacture of specialised hardware or software used exclusively for gambling. We also ensure the companies we invest in meet basic standards of good corporate conduct. We supplement our own research with insights from leading global researcher MSCI.

Our Responsible Investment Policy is constantly evolving and is therefore subject to change. The latest version is available at fisherfunds.co.nz.

Joining the scheme

LifeSaver is open to people who:

- » are New Zealand residents; and
- » are over 18 years of age; and
- » meet the eligibility criteria to join their Employer Scheme (outlined in your employer supplement).

To start your LifeSaver journey simply complete the application form (there's one at the back of this document), including the employer declaration, and send it to us.

Making investments

Making regular contributions to your investment will help you reach your financial goals.

Your regular contributions are deducted directly from your salary by your employer and paid to your LifeSaver account. Your employer may also allow you to make voluntary contributions by regular or lump sum payments.

Your employer supplement specifies the level of contributions your employer has chosen to make, including details of any minimum and maximum contributions.

In addition, you may also be able to transfer your savings into LifeSaver from another workplace savings scheme or equivalent overseas retirement scheme.

Withdrawing your investments

LifeSaver is a long term investment plan designed to help you save for your retirement. In most cases you will not be able to access your savings until you retire or resign. However, early withdrawals are permitted in limited circumstances. You may also be able to make partial withdrawals subject to any terms and conditions set by your employer (such as limits on how often a partial withdrawal can be made, and how much is required to be withdrawn).

Further details on withdrawals and the circumstances in which you are entitled to a benefit can be found in your employer supplement.

Once we are satisfied you have become entitled to a withdrawal or benefit, we'll do everything to make it as quick as possible however full withdrawals may take up to 10 working days to process. Withdrawals are processed using the unit price of your fund(s) at the time we accept your withdrawal.

You may also transfer some or all of your savings to another workplace savings scheme, superannuation scheme, KiwiSaver scheme or equivalent overseas retirement scheme, which you join or are a member of on such terms and conditions as we may determine.

How to switch between funds

LifeSaver offers you the flexibility to switch between the funds that are available to you at any time, with no charge. You can switch funds by completing a switch form available at fisherfunds.co.nz/resources.

3 | DESCRIPTION OF YOUR INVESTMENT OPTIONS

LifeSaver provides a range of investment options so you can choose what's right for you. One of the most important decisions you make when joining LifeSaver is how you want to invest your savings. Many people don't know much about investment strategies and risk indicators and that's why we're here to help you. Talk to one of our financial advisers or take our 'Investor Profile Questionnaire' at fisherfunds.co.nz/lifesaver before you make any decision.

Build your own investment mix

You can choose to invest in one of our seven funds or a mix of them to suit your retirement goals.

The LifeSaver investment options are detailed below and on the following pages.

To help make the investment jargon included in the descriptions a bit easier to understand, we've used the following terms.

Income assets – refers to lower risk investments such as cash and fixed interest securities.

Growth assets – refers to higher risk investments such as Australasian and international equities (shares) and property.

The funds can also hold derivatives (contracts that are valued based on the performance of other assets e.g. for currency hedging purposes) and alternative assets (such as investments in commodities), however there is no specific allocation to these investments. The funds can hold assets either directly or indirectly through other funds.

The aim and investment strategy for each fund can be found in the LifeSaver Statement of Investment Policy and Objectives (SIPO). We regularly review and update the SIPO (in consultation with the Supervisor). When changes are made we will communicate these to you in our annual report. The current SIPO for the funds is available at fisherfunds.co.nz/resources.

Further information about the assets in the funds can be found in the fund updates at fisherfunds.co.nz/resources.

4 | WHAT ARE THE RISKS OF INVESTING?

Understanding the risk indicator

Managed funds in New Zealand must have a standard risk indicator. The risk indicator is designed to help investors understand the uncertainties both for loss and growth that may affect their investment. You can compare funds using the risk indicator.

The risk indicator for each fund can be found in Section 3.

Risk indicator

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at fisherfunds.co.nz/lifesaver.

Note that even the lowest category does not mean a risk-free investment.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years to 30 September 2022. While risk indicators are usually relatively stable, they do shift from time to time. You can see the most recent risk indicator in the latest fund update for each of the funds.

General investment risks

Some of the things that may cause a fund's value to move up and down, which affect the risk indicator, are:

- » **Investment returns risk** – different types of investments have different risks and perform differently at different times. For example, the return on growth assets tends to go up and down more than the returns from income assets. This means short term fluctuations in the value of a fund are common, especially for funds that invest mostly in growth assets like shares.
- » **Market risk** – investment market performance can be affected by economic conditions such as investor opinion, inflation, employment rates and interest rates (including negative interest rates). Political events, and environmental and technological issues also impact investment market performance.

- » **Currency risk** – investments in foreign assets are bought and sold with foreign currency, and the fund may hold foreign currencies directly. The value of the foreign assets and currency can change (up or down) when there are movements in the exchange rate between the New Zealand dollar and the foreign currency.
- » **Investment manager risk** – how we choose to allocate each fund's investments (and the investment decisions made by the managers of any underlying funds in which we invest) will affect that fund's returns. In particular, our investment style may result in our returns differing from any market index and from competing investments.
- » **Credit risk** – the issuer of a security, an institution that we deposit funds with, or a third party that provides a guarantee for either may not honour their obligations, fail to complete transactions, or may become insolvent. If this occurs you may not receive the full amount of your investment in that fund.
- » **Counterparty risk** - a party to an investment contract may not honour their obligations, or fail to complete a transaction, or may become insolvent. If this occurs in any of the investment contracts held by a fund, you may not receive the full amount of your investment in that fund.
- » **Interest rate risk** – fixed interest investments may become more or less valuable depending upon changes in interest rates. If market interest rates rise, existing fixed interest investments become less valuable because new fixed interest investments will pay the current, higher rate of interest, and vice versa when market interest rates fall. Interest rate risk is more applicable to funds that invest mostly in income assets such as fixed interest securities.
- » **Liquidity risk** – low liquidity can affect the ability of the fund to make payments when needed (such as meeting withdrawal requests), or you may receive a lesser amount than expected if the assets have to be sold quickly and there are few buyers.

Further information on risks and the steps we take to reduce their impact on the funds' investments are set out in the 'Other Material Information' document at fisherfunds.co.nz/resources.

5 | WHAT ARE THE FEES?

You will be charged fees for investing in LifeSaver. Fees are deducted from your investment, and will reduce your returns. If Fisher Funds invests in other funds, those funds may also charge fees. The fees you pay will be charged in two ways:

- » **regular charges** (for example, annual fund charges). Small differences in these fees can have a big impact on your investment over the long term;
- » **one-off fees** (for example, fees charged for investing or withdrawing from a fund or for other specific actions you take).

The table below shows our charges by fund. The annual fund charges are based on the fees and expenses from the 31 March 2022 audited financial statements. They are a reasonable estimate of the annual fund charges that are likely to be charged in the future.

Fund	Estimated annual fund charges (% of net asset value)	Other charges
Preservation Fund	0.51%	In addition to the annual fund charges, you may also be charged from your LifeSaver account: » an administration fee; » a supervisor fee; and/or » expenses for services such as legal and audit services. Refer to your employer supplement (What are the fees?) for more information on these fees.
Conservative Fund	0.90%	
New Zealand Fixed Income Fund	0.66%	
Balanced Fund	1.00%	
Growth Fund	1.09%	
Equity Fund	1.13%	
Trans Tasman Equity Fund	0.93%	

Description of the above fees

Annual fund charges

Annual fund charges are made up of:

- » The management fee charged by Fisher Funds for providing investment management services to the funds
- » Expenses incurred by the funds for services such as custody and unit pricing are paid by Fisher Funds from the management fee

Annual fund charges are:

- » Paid from the funds, or the underlying funds they may invest in

Other charges

- » Administration fees
- » Fees charged by the Supervisor who oversees the running of the funds
- » Expenses for services such as legal and audit services

Please refer to your employer supplement for details of other charges charged to you in respect of your membership in LifeSaver.

Individual action fees

There's currently no establishment, termination, or withdrawal fees charged.

You may be charged other fees by us on an individual basis for investor-specific decisions or actions, though this is rare. You may be charged a fee by your financial adviser. Refer to your employer supplement to see if there are any individual action fees that will apply.

Example of how fees apply to an investor

Sarah invests \$10,000 in the Balanced Fund. The starting value of her investment is \$10,000. She is charged management and administration fees, which work out to about \$100 (1.00% of \$10,000). These fees might be more or less if her account balance has increased or decreased over the year. Over the next year, Sarah may pay other charges of \$66.37*.

Estimated total fees for the first year

Individual action fees	\$0.00
Annual fund charges	\$100.00
Other charges	\$66.37*
Total	\$166.37

See the latest fund update for an example of the actual returns and fees investors were charged over the past year.

* The Other charges amount is based on the average administration and supervisor fees and other expenses charged to LifeSaver members over the five years to 31 March 2022 divided by the total average number of LifeSaver members over the same period. The amount you will be charged may vary significantly from this amount depending on the terms and conditions of your Employer Scheme. Refer to your employer supplement for the fees and other charges applicable to your LifeSaver account.

This example applies only to the Balanced Fund. If you are considering investing in other funds in the scheme, this example may not be representative of the actual fees you may be charged.

The fees can be changed

Our fees may change or new fees may be added — we'll let you know if they do. If we do make any changes, we'll notify those changes to the Supervisor. Any changes to fees will be made only if they are within the rules that apply to LifeSaver.

The LifeSaver Governing Document limits the maximum amount of Supervisor and investment management fees, and costs associated with investment management to 1.5% per annum of the gross assets of an Employer Scheme. The limit does not apply to other fees and expenses such as administration fees, brokerage, printing and postage and the cost of insurance.

Fisher Funds must publish a fund update for each fund showing the fees actually charged during the most recent year. Fund updates, including past updates, are available at fisherfunds.co.nz/resources.

6 | WHAT TAXES WILL YOU PAY?

LifeSaver is a portfolio investment entity. The amount of tax you pay is based on your prescribed investor rate (PIR). To determine your PIR go to fisherfunds.co.nz/faqs. If you are unsure of your PIR, we recommend you seek professional advice or contact the Inland Revenue Department. It is your responsibility to tell Fisher Funds your PIR when you invest or if your PIR changes. If you do not tell Fisher Funds, a default rate may be applied. If the rate applied to your PIE income is lower than your correct

PIR you will be required to pay any tax shortfall as part of the income tax year-end process. If the rate applied to your PIE income is higher than your PIR any tax over-withheld will be used to reduce any income tax liability you may have for the tax year and any remaining amount will be refunded to you by Inland Revenue.

See under the heading 'Tax' in the 'Other Material Information' document at fisherfunds.co.nz/resources for more information on how your investment earnings and contributions are taxed, or give us a call for more information on investment tax.
